

Update on our Healthier Air Appeal

Dear Parents

Contributions to our **Cleaner Air in Classrooms** campaign
have now reached £55,700.

We would like to raise a further £29,300 to attain our target

Evidence is growing daily of the unseen risks to health of Air Pollution,
both to adults (parents and teachers),
and more especially so to all children.

The cleaner the air, the safer our children, both from pollution and from virus infection.

Recent research has shown **the less polluted the air is, the less is the likelihood of spreading coronavirus.**

If you are one of the families who have not yet donated, perhaps *The Times* articles [accessible here](#) will further confirm to you how dangerous Air Pollution is for our children and what a growing problem this is for their future health and wellbeing.

With the COVID-19 outbreak, we decided to accelerate our IQAir Purifiers purchase & installation programme.

IQAir Purifiers are now very much in worldwide demand due to their effective use in cleaning air in emergency hospital environments.

Having reserved our Air Purifiers last year, we have now been able to complete our purchase using your donations and our own reserves.

When we all return to school after lockdown, you will find Air Purifiers installed and in operation in EVERY CLASSROOM, the CANTEENS and in the GYMNASIUMS at both schools.

***We thank you for your support past and future.
Please donate***
